Maksim
Lauryniuk

Software Engineer

OVERVIEW

Software Engineer with a high interest in the field of web development and skills for web application development. As a software engineer, I strive for continuous learning and have a strong motivation to improve my skills in web development. This allows me to constantly utilize the latest and most advanced approaches to create web applications that are fully responsive in development and design. Keeping up to date with industry trends ensures that the solutions I offer not only meet, but exceed expectations.

WORK EXPERIENCE

MOBECLS (AUG 2023 - PRESENT)

Software Engineer · Full-time

Development of custom solutions in e-commerce domain. Creating quality stores and adding unique features to increase sales in commercial stores. Worked alongside designers, project managers, and other engineers to translate creative concepts into finalized digital solutions in a fast-paced environment. Maintained off-the-shelf solutions, adding new features and plugins to already created stores. Updating stores and migrating to a single-page version of the app.

INNOWISE GROUP (APR 2022 - AUG 2023)

Software Engineer · Full-time

Developing quality websites, web applications and scripts for various platforms. Experience includes user interface development, design development, application testing, database integration, and implementation of functionality in various programming languages. Conducted quality assurance tests on various websites to ensure cross-browser compatibility and mobile responsiveness. Developed, maintained, and delivered production code for client websites utilizing **various** technologies. Collaborated with designers and other developers to ensure a thoughtful and consistent user experience across all web applications.
Development utilized HTML, CSS, SASS/LESS, JavaScript, jQuery, React, PHP, Laravel, Blade, Twig, MySQL, PostgreSQL, Nginx, Docker, Javascript, Laravel, Blade, Twig, Sass, Vue, React, Liquid, Qodana, Phpstan, Git, RabbitMQ, Rest Api, Redis, GraphQL, Elasticsearch, Go, Goravel, Gin.

E-COMMERCE NDA PROJECT (AUG 2022 - JAN 2023)

Software Engineer · Full-time

Updating and maintaining the project on Zend Framework. Creating and adding new features to the project with a large team. Changing the user interface and adding new functionality to the project. Fixing bugs environment (PHP / Zend / Laminas / React / Elasticsearch / Vagrant / Docker / Ruby / VMware). Upgrading legacy library and platform code from PHP 5.6 to PHP 8.1.

INSTINCTOOLS (DEC 2021 - FEB 2022)

Software Engineer Trainee · Part-time

Create, design, and ship high-quality websites, design systems, and digital experiences for multi-page projects using HTML, CSS, SASS/LESS, Javascript, NodeJS, Figma, Photoshop, React JS, and jQuery.
